GABLE VENTS

Like Vulcan Vent's entire product line, their gable vents are fire and ember resistant. A combination of vertical and horizontal vents are recommended for proper ventilation. On hotter days, lower horizontal vents will intake relatively cooler air when there is sufficient venting above the horizontal (soffit, eave, continuous) and exhausts hot air from the attic through vertical gable and dormer vents.

VG (VULCAN GABLE)

- **Retro-fit applications are available**
- **More Sizes available through custom order**
- **Suffix index:**
FF = Wood
S = Stucco
FB = Foam Back
FC = Fiber Cement
